

## Council Opens Negotiations

PRIOR TO the counting of ballots cast in the referendum, G. J. Demmon, standing with paper, chairman of the Referendum Board, reads out instructions to the teams. A government representative, a representative of the petitioning group and a neutral teller made up each team.

PROME DI eonta e votonan eual a wordé tira den e referendum, G. J. Demmon, pará eu papel den su man, voorzitter di e Referendum Board, ta leza instruccionnan pa e teamnan. Un representante di gobierno, un representante di e grupo eual a haci e peticion y un teller a completa cada team.

### Employee Requirements Filled

## Lago Hiring Curtailed; Employment Office Closed; ATS, LVS Students Terminated

Employment of additional Lago personnel has been curtailed.

The management decision, announced May 23, is the result of the company being unable under present conditions to accept any new applications for employment. Immediate steps not to increase the personnel rolls took two forms: (1) this year's Lago Vocational School graduates and temporary Aruba Technical School employees will be terminated June 15, and, (2) the employment office at Cate 1 was closed.

The outlook on Lago's present employee requirements made it necessary to curtail the hiring of additional employees. Signs reading "Closed" and "No Applications For Employment Accepted" were posted the morning of May 23 at the employment office.

Coincident with the sign-posting, the Lago Vocational School and Aruba Technical School students were notified they were to be terminated. With the two groups of students, 43 are involved. Thirty-three of the 36 LVS graduates and all 10 temporary ATS fall under the termination. Three vocational school students will be retained to fill three openings.

Although Lago expressed its regret at having to release young men who have been well prepared for jobs at Lago, it cannot justify employing them when conditions actually indicate a possible need for further reductions. Under existing conditions there are no jobs for them. To the students' great benefit however, is the fact that they have received education and training in trades that are needed in many parts of the world and can be available to them throughout their lives.

The LVS boys, regular Lago employees with vocational student classification, will receive a graduation diploma. The ATS students will receive certificates. The 10 technical school students were hired one year ago as temporary employees under the condition that at the completion of their training, they would become

permanent employees if jobs were available. This is the fourth group of ATS students Lago has taken under such arrangements.

The 36 boys that make up this year's vocational school are the last students in an industrial vocational school that started in 1935. At its peak in the late Forties and early Fifties it had an enrollment of well over 400 students whose training costs mounted to more than one million guilders a year. Because of its efficient and well-organized means of training boys for industrial jobs it has attracted and continues to attract attention from North and South American and Caribbean enterprises involved in similar types of training.

The school opened in 1935 with

30 students. The youngsters of that era went to class one hour a day for two years. They studied under Jan H. Beaujon of the Industrial Relations Department. The second class of students entered the training in 1937; they attended classes two hours a day. In 1939 the first four-year class began school. It gradually increased to four full classes enrolled in school for four years. The students attended classes the entire day for the first three years, and then during the final year split their day between instruction on the job in the refinery and in Lago Vocational School classes.

Since its beginning, the school enrolled 1243 students. It graduated 954, almost all of whom are Lago employees today.

## Empleo na Lago Reducí; LVS Studiantenan Terminá Oficina di Empleo Será Como Tur Posicionan Ta Yená

Empleamento di personal adicional pa Lago a wordé reduci.

E decision di directiva anunció Mei 23 ta e resultado cu e compania bao e condicionnan actual no por accepta ningun aplicacion nobo pa empleo. Pasonan inmediato pa no aumenta personal a tuma dos forma: (1) E estudiantenan cu ta gradua e unja aki di Lago Vocational School y e empleadonan temporario di Ambachtschool di Aruba lo wordé terminá Juni 15, y (2) e oficina di empleo na Porta No. 1 a wordé cerrá.

E perspectiva ariba Lago su necesidad actual di empleado a haci necesario pa reduci tumamento di empleadonan adicional. Borchinan cu e indicacion "Closed" (Cerrá) y "No Applications For Employment Accepted" (No Ta Accepta Aplicacion Pa Empleo) a wordé instalá e mainta di Mei 23 na e oficina di empleo.

Coincidiendo cu e ponemento di borehi, e estudiantenan di Lago Vocational School y Ambachtschool di Aruba a wordé notificá cu nan empleo lo wordé terminá. Di e dos gruponan di estudiantenan, 43 ta involvi. Trinta-y-tres di e 36 graduado di LVS y tur 10 empleadonan tempora-

rio di ATS ta cai bao e terminacion. Tres estudiantenan di LVS lo keda pa yena tres vacatura.

Aunque Lago a expresa cu e ta lamenta di mester laga e hobennan bai kende a wordé bon prepará pa trabao na Lago, el no por haya justificacion pa emplea nan ora condicionnan realmente ta indica un posible necesidad pa mas reduccion di personal. Bao condicionnan existente no tin trabao pa nan. Sinembargo, un gran beneficio pa e estudiantenan ta e hecho cu nan a haya un educacion y training den ofishi pa cual tin un necesidad den hopi parti di mundo y cu por ta valuable pa nan durante henter nan vida.

E hobennan di LVS, empleadonan

## LEC To Remain Intact For Wage Discussions

This week the Lago Employee Council renewed its negotiations with management on the subject of a general increase for employees, and declared through its president F. H. Ritfeld that they have no intention of resigning en masse until the negotiations are concluded.

"When the matter of the increase is settled," Mr. Ritfeld said, "each council member will decide independently on his future course of action."

The negotiations were resumed following the referendum May 15, 16 and 17 which continued the internal independent employee representation system.

The members of the council initiated the referendum to determine how solidly their constituents were behind them. On the ballot voters were asked to indicate whether they wished the council to continue to represent them. The choice was therefore between the LEC on one side and no system at all on the other.

Of the total 4965 ballots cast, the votes for LEC representation were 2336, votes against the system 2474. Under the terms of the contract 2672 votes were needed to have company recognition withdrawn from the LEC. That number equals 50% of the eligible employees plus one vote.

Heaviest voting of the three days took place at the polling place near the General Office Building, where 825 employees cast ballots. Of these 546 voted for the LEC, 252 against, and 27 were invalid. At the hospital, out of 217 votes cast, the LEC had 148 for, 60 against and 9 invalid.

If, after the conclusion of current negotiations on the wage increase, all 13 members of the council should resign, alternate members will be asked to serve on the council. Should the number of resignations exceed the number of alternates, new elections to fill the vacancies will be held as soon as possible. Even if all 13 members should resign, the LEC system would remain in effect.

While the Lago referendum was going on a somewhat similar election was taking place in the Bayway refinery. There, in a National Labor Relations Board certification vote, employees were choosing between the independent representation system and the Oil, Chemical and Atomic Workers union of the CIO. With 93 per cent participation, the employees voted to be represent-

## Lago Directors, Officers Re-Elected

Directors and officers of Lago Oil & Transport Co., Ltd. were re-elected at annual meetings recently.

At the annual shareholders' meeting April 29, F. C. Donovan, F. E. Criffin, O. S. Mingus, W. A. Murray and F. W. Switzer were re-elected directors of the company.

The Board of Directors, on May 14, re-elected the following officers: president, O. S. Mingus; executive vice president, F. E. Criffin; vice president, C. E. Lanning; secretary, C. B. Carber; treasurer, C. B. Garber. D. C. Mook, New York, was re-appointed assistant secretary, and W. T. Murphy was re-appointed assistant secretary and assistant treasurer.

ed on the independent basis, 1123 votes to 825.

Traditionally the independent system has worked best for a number of companies for many years, including Standard Oil Company (New Jersey) and its affiliates. The basic philosophy behind the system is that employees on the spot know their own problems better than an internationally affiliated union possible could, and that workers in one plant or company need not be affected by conditions in another, as happens in the international union.

## Council A Habri Negociacionnan Di Pago

E siman aki Lago Employee Council a resumi su negociacionnan cu directiva ariba e asunto di un aumento general pa empleadonan, y a declara door di su presidente F. H. Ritfeld cu nan no tin intencion di baha en bloc te ora e negociacionnan keda cla.

"Ora asunto di e aumento ta areglá," Sr. Ritfeld a bisa, "cada miembro di council lo decidi independientemente ariba su accion futuro."

E negociacionnan a wordé resumi despues di e referendum Mei 15, 16 y 17 cual a mantene na vigor e sistema interno di representacion independiente di empleado.

E miembronan di council a principia e referendum pa determina com solidamente nan constituyentenan tabata na tras. Ariba e carchinan votadonan a wordé pidi pa indica si nan ta desea pa council sigui representa nan. E eleccion pesey tabata entre LEC na un banda y ningun sistema por total na e otro.

Di e total 4965 voto bentá, e votonan na favor di representacion di LEC tabata 2336, votonan contra e sistema 2474. Segun stipulacion di e contract tabatin mester di 2672 voto pa laga compania kita reconocimento for di LEC. E cifra aki ta igual na 50% di empleadonan eligibile plus uno.

E lugar unda votamento tabata mas pisá den e tres dianan tabata na e stacion cerca di Oficina General, unda 825 empleado a vota. Di esaki 546 a vota pa LEC, 252 contra, y 27 invalido. Na Hospital, di 217 voto, LEC a haya 148, tabatin 60 contra y 9 invalido.

Si, despues di conclusion di e negociacionnan actual ariba e aumento general, tur 13 miembro di council baha, nan reemplazo lo wordé pidi pa sigui den council. Si e cantidad di resignacion ta mas grandi cu e cantidad di reemplazo, anto eleccion nobo pa yena e vacaturan lo wordé teni mas pronto posible. Hasta si tur 13 miembro baha, e sistema di LEC lo keda na vigor.

Mientras e referendum na Lago tabata tumando lugar un eleccion algo similar tabata wordé conduci

## Ideanan Creditable Afecta

### CYI Committee ta Haci Cambio den Reglamentonan

Cambionan cual ta furni un base mas amplio pa premionan y cual ta haci posible un tratamiento mas liher di sugerencianan a worde haci den e plan di Coin Your Ideas. E cambionan a dreuta na vigor Juni 1.

Dos asunto a worde kitá for di e lista di ideanan no-creditable y dos a worde poni acerca. E resultadonan ta haci posible pa e comité di CYI tuma decision final ariba ideanan no-creditable.

Punto "F" den e lista bieuw di no-creditable tabata un di dos cu a worde kitá. Esaki tabata pertene na pedida pa instalacion of cambiamentu di luz, pasada, plataforma y borchinan. Experiencia di e comité den pasado ta indica cu hopi sugerencianan sacá anteriormente bao di e punto aki a worde considerá despues y tratá como idea creditable.

E punto cu ta cubri ideanan cu tabata worde considerá como parti di trabao rutina di e originador tambe a worde kitá. E comité tabata di opinion cu e punto aki tabata trata mas cu eligibilidad pa premio cu e ta trata cu ideanan creditable, y cu su kitamento ta asegura tratamentu di tal idea mandá aden, no obstante clasificacion di trabao di e originador.

Cerca e lista di ideanan no-creditable a worde agregá cierto cosnan ariba cual compania no ta eherce autoridad completo. Esaki ta inclui funcion y operacion di gruponan di representacion di empleado, y idea-

### Camera Club ta Organiza Concurso

Entusiasticonan di fotografia den Antillas cu ta miembro di un camera club reconocí, a worde invitá pa participa den un concurso di fotografia bau auspicio di Aruba Camera Club.

Entradanan mester worde mandá aden na e club na direccion di J. Van Eijk, 79 L. G. Smith Boulevard, Oranjestad, promer cu Juni 20 pa nan ta eligible.

Tres categoria ta disponible pa participantenan: blanco y preto pa cuminzadornan, blanco y preto pa amateurnan avanzá, y retratonan di color. Concursantenan mester manda aden tres retrato den cual categoria cu ta.

E portretnan blanco y preto mester ta a lo menos 8 x 10 inch, y preferiblemente 11 x 14, montá ariba pasteboard di color cla. E tamanjo recomendable pa retratonan montá ta 16 x 20 inch. E obheto ta liber.

nan cu no ta pertenece na operacionnan di compania.

E filosofia basico y administracion di e plan ta keda sin cambio. E obheto di e cambionan ta pa acelera tratamentu di ideanan y na mes tempo sigui duna cada idea creditable un investigacion y evaluacion completo.

### Empleo Reduci

(Continúa di pagina 1)

regular di Lago cu clasificacion di estudiante di ofishi, lo ricibi un diploma dia nan gradua. E estudiantenan di ATS lo ricibi certificado. E 10 estudiantenan di school tecnico a worde empleá un anja pasá como empleadonan temporario bao di e condicion cu ora nan caba nan estudio, lo nan bira empleadonan permanente si tin trabao disponibel. Esaki ta di cuatro grupo di estudiantenan di ATS cu Lago a tuma bao di tal arreglonan.

E 36 hobennan cu ta compone e school di ofishi di e anja aki ta e ultimo estudiantenan den un school di ofishi industrial cu a principia na 1935. Na su punto di culminacion den ultimo anjanan di 1940 y promer di 1950 e school tabatin un cantidad di mas di 400 estudiante kende nan enseyanza a costa over di un milyon florin pa anja. Pa motibo di su metodo eficiente y bon organizá di educa hobennan pa trabaonan industrial el a atrae y ta sigui atrae atencion di empresanan den America del Norte y Sur y den Caribe cu tin clase-nan similar di enseyanza.

E school a habri na 1935 cu 30 estudiante. E hobennan di tal tempo a atende klas un ora pa dia durante dos anja. Nan a studia bao Jan H. Beaujon di Departamento di Relaciones Industrial. E segundo klas di estudiantenan a principia nan training na 1937; nan a sigui klasnan dos ora pa dia. Na 1939 a promer klas di 4-anja a cuminsa bai school. Esaki a aumenta na cuatro klas completo cu a atende school durante cuatro anja. E estudiantenan tabata atende klas henter dia durante e promer tres anja y despues durante e anja final nan dia tabata parti entre instruccion na trabao den refineria y den klasnan di Lago Vocational School.

Desde su principio, e school a tuma 1243 estudiante. Un total di 954 di nan a gradua, di cualnan casi tur ta empleado di Lago awe.

## Clark Will Lead First Seminar

The man who once told 200 U. S. admirals and generals to "think up or shut up," Charles H. Clark, is the headliner of the Seminar Committee's first offering of the year.

The course he will be leading is a four group, two-hour-a-week seminar in "Creative Thinking," based on his development of the so-called brainstorming technique.

Charles Clark

This technique, originated by Alex Osborn, one of advertising's leading figures, involves small groups talking informally about a specific problem and contributing ideas to its solution. All ideas, no matter how ridiculous are accepted, the theory being that one idea begets another, and the solution is a group solution.

Mr. Clark, an employee of the Ethyl Corporation, has worked with a number of other oil companies, demonstrating his program. His clients include Esso Standard Oil, Standard Oil of Indiana, Shell, Humble, Tidewater and Socony Mobil, as well as the U. S. army and navy.

His classes at Lago, all filled, begin June 11 and will end July 5.

### Space Available In Seminars

Space in the two Human Relations Seminars beginning July 8 and 9 is still available, the Seminar Committee has announced.

Applications blanks can be picked up at the Training Division Office, BQ 3, and the deadline for filing completed applications has been extended to June 15.

Professor Robert Blake of the University of Texas will conduct the course.

### Faunce Retires As Zone Foreman

S. G. Faunce, a Lago employee since 1934, left Aruba May 31 on furlough preceding his retirement from service August 1.

S. G. Faunce

zone foreman in

He began his company career in February, 1934 as tradesman in the Machinist Craft, and was promoted to subforeman in November, 1936. He was made assistant general foreman in October, 1941, also in Machinist, and in January, 1951.

MAKING A final check of the votes before announcing the official results are F. H. Ritfeld, president of the LEC, R. Da Costa Gomez, representing the government for the referendum, and G. J. Demmon, chairman of the Referendum Board.

HACIENDO un check final di e votonan prome di anuncia e resultado final ta F. H. Ritfeld, presidente di e LEC, R. Da Costa Gomez, representando e gobierno pa e referendum, y G. J. Demmon, voorzitter di e Referendum Board.

### Negociacionnan

(Continúa di pagina 1)

na refineria di Bayway. Aya, den un voto di certificacion di National Labor Relations Board, empleadonan tabata escoge entre e sistema independiente di representacion y Oil, Chemical & Atomic Workers Union di CIO. Cu 93 por ciento di participacion, e empleadonan a vota pa worde representá ariba base independiente, 1123 voto pa 825.

Tradicionalmente e sistema independiente a funciona mehor pa algun companianan pa hopi anja, incluyendo Standard Oil Company (New Jersey) y su afiliadonan. E filosofia basico tras di e sistema ta cu empleadonan na e lugar conoce nan problemanan mehor cu un union afiliá internacionalmente, y cu trahadornan den un planta of compania no tin mester di worde afectá door di condicionnan den un otro, manera ta socede den e union international. E sistema aki ta duna empleadonan exactamente loke e nomber ta indica: independencia.

E actual contract entre Lago y LEC ta cubri un periodo di 18 luna, terminando Feb. 28, 1958. Un clausula tabata permiti negociacion pa un aumento worde habri Maart 1, loke LEC a haci. E negociacionnan tabata en progreso ora e council a decidi pa acerca su constituyentenan y pidi un voto di confianza. Segun e resultadonan e sistema di representacion manera e ta awor lo keda na vigor. E contract ta bisa especificamente cu solamente un di tal peticion pidiendo un referendum por worde conduci durante su duracion. Ora e contract termina Februari otro anja LEC y Directiva lo negocia un otro. Te e tempo empleadonan y compania lo sigui observa reglanan di e contract existente.

### Oficialnan di Compania Re-eligi

Directornan y oficialnan di Lago Oil & Transport Co., Ltd., a worde re-eligi recientemente na reunionnan anual.

Na e reunion anual di accionistanan April 29, F. C. Donovan, F. E. Griffin, O. S. Mungus, W. A. Murray y F. W. Switzer a worde re-eligi como directornan di compania.

Junta de Directornan ariba Mei 14 a re-eligi e siguiente oficialnan: presidente, O. S. Mungus; vice-presidente ehecutivo, F. E. Griffin; vice-presidente, C. E. Lanning; secretario, C. B. Garber; tesorero, C. B. Garber, D. C. Mook, New York, a worde nombrá atrobe como segunda secretario, y W. T. Murphy a worde re-nombrá como segunda secretario y segunda tesorero.

### Negotiations

(Continued from page 1)

The system gives to employees exactly what the name indicates: independence.

The current LEC-Lago contract covers a period of 18 months, ending Feb. 28, 1958. A clause permitted wage negotiations to be reopened last March 1, which the LEC did. These negotiations were in fact underway when the council chose to go to their constituents for a vote of confidence. By the results the representation system as it now stands will remain in effect. The contract specifically says that only one such petition requesting a referendum can be acted on during the time covered by it. When the contract expires next February the LEC and management will negotiate a new one. Until that time employees and the company will live under the terms of the existing one.

# St. Augustinus Wins Track Meet

CONCERN, INTEREST and apprehension are reflected in the faces of these athletes watching their teammates perform during the meet. Boys from seven schools look part.

PREOCUPACION, INTERES y spanto ta refleha den cara di e atletanan aki cu ta mirando nan companjeronan actua durante e encuentro. Muchanan di siete school a luma parti.

The strong young men of St. Augustinus College won the island school track and field championship for their school in the Fourth Inter-School Competition at Lago Sport Park May 3.

They amassed 94 points in the 11 events to edge Lago High School's 87½. Finishing third with 64½ points was St. Dominicus College; Abraham de Veer School and Aruba Technical School tied for fourth with 31½, and Juliana School had 20 points.

More than 3000 persons watched the meet, held under the auspices of the School Sport Association. E. C. L. Bergen, president of the association, was in general charge of the tournament.

In winning the championship, St. Augustinus placed first in the running broad jump, 220-yard dash, 80-yard dash and high jump, and second in two relay events. Kyle Spitzer of Lago High School and G. De Mattos of Abraham de Veer School were the individual stars, Spitzer finishing first in the 100-yard dash and second in the high jump, and De Mattos first in the high jump and second in the broad jump.

IN A close finish in the 220-yard dash R. McDonald, left, of St. Augustinus College, edges Lago High School's R. Massey. The winning time was 26.4 seconds.

DEN UN finish pretá den 220-yarda dash R. McDonald, robez, di St. Augustinus College, ta gana R. Massey di Lago High School. E tempo tabata 26.4 seconde.

## St. Augustinus Ta Gana Evento Atletico

E hobenan fuerte di St. Augustinus College a gana e campeonato pa e evento atletico entre tur schoolnan di Aruba cu a worde teni na Lago Sport Park Mei 3.

Nan a acumula 94 punto den 11 evento, mientras Lago High School a termina cu 87½. Di tres tabata St. Dominicus College cu 64½; Abraham de Veer School y Arubaanse Technische School a empata pa di cuatro lugar cu 31½, y Juliana School tabatin 20 punto.

Mas cu 3000 persona a presencia e evento cu a worde teni bao auspicio di e comité pa sport na schoolnan. E. C. L. Bergen, presidente di e comité, tabatin encargo general ariba e torneo.

Ganando e campeonato St. Augustinus a sali promer den bulamento leuw na careda, 220-yarda dash, 80-yarda dash y salto halto, y segunda den dos evento di relay. Kyle Spitzer di Lago High School y G. de Mattos di Abraham de Veer School tabata e atletanan individual, Spitzer ganando den e 100-yarda dash y segunda den salto halto, y De Mattos ganando den salto halto y segunda den bulamento leuw.

LAGO HIGH School finished one-two-three in the 880 yard dash. J. Roby, the winner, accepts his trophy from Frere Laurentius, principal of St. Augustinus College. J. Hagerty, at his right, was third, and D. Wease, was second. Roby's time was 2:30.

LAGO HIGH School a termina un-dos-tres den 880 yarda dash. J. Roby e ganador ta acepta e trofeo for di Frere Laurentius, director di St. Augustinus College. J. Hagerty, na su banda drechi, tabata di tres, y D. Wease tabata segunda. E tempo di Roby tabata 2:30.

IVAN PETERS of St. Augustinus College takes off in the high jump. S. Henneq, with a jump of 17.11 feet, won the broad jump event.

IVAN PETERS di St. Augustinus College ta tuma e salto leuw. S. Henneq, cu un salto di 17.11 pia, a gana e evento di salto leuw.

THE JUDGES ponder during the event. From left, Judge Frank Edwards, Recorder Sidney Green and Judge Horace Grant.

UN ATLETA no identificá ta pasa e bara den e salto halto. Ganador den e evento aki tabata G. De Mattos, De Veer School cu 5.8 pia.

### Summary of Winners

- High jump, seniors: G. De Mattos, 5.8; K. Spitzer; M. Hope.
- 100 yards dash, seniors: K. Spitzer 10.9; L. M. Massey; L. MacDonald.
- Running broad jump, juniors: Rafael Willemsen 15.6½; A. Wever; M. Geerman.
- 220 yards dash, juniors: C. Sanchez 29.7; R. Rasmijn; R. Richardson.
- 220 yards dash, seniors: R. MacDonald 26.4; R. Massey; C. Moore.
- 880 flat, seniors: Roby 2:30; D. Wease; J. Hagerty.
- Relay 4x220 yards, seniors: Lago High School; St. Augustinus College; St. Dominicus College; Juliana School; Abraham De Veer School.
- Broad jump, seniors: S. Henneq 17.11½; G. De Mattos; L. Edwards.
- 80 yards dash, juniors: R. Richardson 9.0; Ivan Peters; Rosario Rasmijn.
- Relay 4x220 yards, juniors: St. Dominicus College; St. Augustinus College; Julianaschool; Lago High School; Abraham de Veer School.
- High jump, juniors: Clifton Foy 49½; J. McDermott; J. Moore; A. Wever; E. van der Biezen.

# The Short And Busy Life of Miss Bee

## These Tiny Creatures Work A Long Day with No Overtime

If man followed the example of the industrious bee, there is quite literally nothing he could not accomplish. But imitating the bee would also have a detrimental effect on man, because the work load would kill him.

In some aspects the bee is man's superior. She has, for example, an infallible sense of direction, which permits her to fly in a string-straight line from a nectar supply to her hive; a near perfect communication system with her fellows, enabling her to tell them exactly where a new nectar supply is located. She is an accomplished builder, and a very even-tempered creature, slow to anger, but swift to do something about it when she is angered.

Nobody in Aruba has greater respect or admiration for the bee and her works than Alfred Vieira, who has turned a boyhood hobby into a profitable side business, and now has 38 hives scattered over the island, housing hundreds of thousands—millions, maybe, of bees.

Mr. Vieira, whose honey is on sale at both commissaries and in other stores on the island, has been beekeeping for 29 years, nine years before he came to Aruba from British Guiana. He has taken a leaf from the bee's book on industry; he holds a full time job with Lago as an operator; he operates a radio-phonograph sales and service business, keeps his bees, and does his own carpentry and building.

### Division Of Work

During the time of greatest honey activity—called a "honey flow"—bees will work 20 hours a day. From the time the bee ingests the nectar from the blossoms (best ones in Aruba: sea grapes, sage) production takes several steps, half being the bee's, half the beekeeper's.

The change from nectar to honey is a simple process: digestion. Between the blossom and the hive this change takes place inside the bee, and he deposits the honey in the cells of the hive. The bee actually has two stomachs: one for transporting the nectar, and the other for her normal digestive functions.

When enough cells in the comb are filled, the bees seal them over with a wax, letting the honey age, or cure. With that, the bee's work in production ends, and they turn the job over to Mr. Vieira.

He takes the sealed-up combs, slices off the wax cap with a steam knife, and locks it in a centrifuge. The whirling action throws the honey out to be strained and drained into tanks, and there it stays until it is bottled. It needs no further purification to be edible.

How often does this go on in a year? How much honey comes from the hives?

In Aruba Mr. Vieira gets three or four harvests a year if there has been enough rain. And in a good year, as much as 25 gallons of honey will be the yield from a single strong hive. The job of grappling with the bees' boxes is made greater by the weight: one gallon is equal to 12 to 14 pounds.

### Stings

First among questions about bees is: what about stings? "Bees," says one authority, "are the pleasantest, most sociable, most genial and best-natured little beings... when they are understood." But beware of them after a rainstorm or toward night on cool days, especially if intruding on their hives. Mr. Vieira himself has been stung countless times, especially on one notable occasion when 20 hives fell over. By now however he has become immune to stings to such an extent that there won't even be a swelling.

A curious fact about bee stings is that they can be fatal to both human beings and animals. Mr. Vieira has seen donkeys and cows stung to death right before his eyes, the whole killing taking place in a few

REMOVING FULL combs from the hives, Mr. Vieira SACANDO e graatnan yen for di den e casnan. Sr. and his helpers are well protected by hats and veils. Vieira y su ayudantenan ta bon protegá door di sombré y velo. E monton di cahitanan yama un cas; e cabita where the queen lays the eggs, the ones on top are di mas abao ta unda e reina ta pone webo. y esnan mas arriba ta unda e abejanan ta warda e miel.

moments. But bees, like humans, have their good days and bad. So says sting-proof Mr. Vieira.

In each hive there are three kinds of bees: the ruler, the only one of her kind, the queen. Then there are the workers, who gather the nectar, pollen and wax from the flowers, feed the young, protect the hive and build the combs. They also play an important part in pollinating the blossoms, producing more fruit. These work so hard that their life span is a mere six months, or even less in the honey flow. Last is the drone, the only males in the colony. They have but one function, and only one drone performs that, mating with the queen. The others, for the rest of their lives, do nothing at all except eat honey. But when a honey flow is ended, the workers drive them out of the hive to starve to death. Hardly any drones die a natural death. The sole distinction of a drone is the possession of eyes that can rotate 360 degrees. He doesn't even have a sting.

### Queen Is Ruler

The life of the hive is centered around the queen, who is the mother as well as the ruler. The one mating flight, after which the drone dies, is the only one she requires. It is rare that a queen mates more than once. This mating then permits her to lay eggs for the rest of her life, sometimes as many as 1,800 a day, in a quantity depending on the need of the colony and the ability of the workers to feed the young. The queen sometimes lives as long as ten years. This is only her life span, but she is never allowed it by the beekeeper because of her slowing down on egg laying, which is very important to keep the hive strength up with large working forces. Her longevity is partially explained by the fact of her comparative idleness, egg-laying notwithstanding, and partly by her diet. During her lifetime she is fed a secretion called "royal jelly" by a coterie of surrounding attendants. This jelly, supplying her with much vigor and vitality, has been used in humans with startling success. It rejuvenates, gives energy and health and strength, and it is partially credited with restoring the health of Pope Pius XII in 1954.

When a hive becomes overcrowded and the inhabitants decide to move, there takes place the phenomenon of "swarming." They will cluster in enormous numbers on fences, trees or anywhere, and eventually abandon their hive. Beekeepers find them easy to recapture in this stage, though, because they are filled up

(Continued on page 8)

THE LADY herself: the worker bee, a marvelous creature, who lives a straight-forward, hard-working life, takes care of the queen's young, feeds the loafing drones and dies early.

E DAMA mes: e abeja trabador, un criatura maravilosa, cu ta biba un vida di trabao duro, ta percursa pa e chikitanan di e reina, duna esnan cu no ta traha di come y ta muri tempran.

MR. VIEIRA'S nine-year-old son, Alfred, Jr., knows the bee business, keeps his own hives, earns his own pocket money. E YIU di nuebe anja di Sr. Vieira, Alfred, Jr., conoce e negoshi di abeja, y ta gana su mes placa. Aki el ta corre e abejanan for

At left it. In di e g graat

EASILY RECOGNIZED by her size, the queen bee (in circle) is longer than the others. She stays generally close to home, is ruler and mother of the hive. She lives the longest of any bee and if allowed by the beekeeper would live to the age of 10 years.

FACIL pa reconoce pa su lamanjo, e reina ta mas largo cu e otronan. E ta keda cerca di cas y ta gobernadora di e cas. E ta biba mas largo cu tur y si e tenedor lage'le e por biba 10 anja.

SLICING THE wax seal, or capping, is the first step in extracting honey. All of this wax, purest available, is reclaimed. There is roughly one pound of wax for each 100 pounds of honey

CORTANDO e sella di was ta e promer paso den sacamento di miel. Tur e was aki, cu ta di mas puro, por worde usá. Ariha cada 100 libro di miel tin mas of menos un libro di was.

LOOKING DOWN on the centrifuge: the honey is swirling out of the comb. There may be seven or eight of these combs in each chamber, each heavy with honey. MIRANDO ariha e centro: e miel ta corre for di den e graat. Den cada kamher por tin siete of ocho di esakinan, cada uno cargá cu miel.

# E Bida Cortico y Duro di un Abeja

Si hende sigui ehemplo di e balente abeja, anto no ta keda mucho cu el por laga di haci. Pero imitacion di e abeja lo tin tambe un efecto detrimental pa hende, pasobra e trabao lo mate'le.

Den cierto respecto e abeja ta superior na hende. Por ehemplo, e tin un sentido in fallible di direccion, cu ta permitie'le bula linja recto for di su fuente di miel pa cas; un medio di comunicacion cu su companjeronan casi perfecto, cu ta permitie'le pa bisa nan unda un fuente nobo di miel a worde descubri. E ta un tradador competente, y un criatura cu temperamento igual, cu ta tarda pa rabia pero cu ta liher pa actua asina liher cu e rabia.

Ningun hende na Aruba tin mas respet of admiracion pa e abeja y su trabaoan cu Alfred Vieira, kende a haci un hobby di tempo el tabata mucha den un negoshi chikito profitable, y awor tin 38 casita di abeja over di henter e isla cu cientos di miles of podiser millones di abeja.

Sr. Vieira, kende su miel ta worde bendi na ambos comisario y na otro tiendan anriba e isla, ya ta teniendo abeja 29 anja, nuebe anja promer cu el a bini Aruba for di British Guiana. El a tuma algo over di e abejanan: el tin un trabao cu Lago como operator; el ta mantene

un negoshi di drechamento di radio y bendemento di disco, ta percursa pa su abejanan, y e ta haci su mes trabaoan di carpinter of construcion.

### Partimento di Trabao

Durante e tempo di mas grandi actividad di miel e abejanan ta traha 20 ora pa dia. For di e momento cu e abeja saca e nectar for di e flornan, e produccion ta tuma varios paso, mitar pa cuenta di e abeja y mitar pa e tenedor.

E cambio di nectar ta un proceso simple: digestion. Entre e flor y cas di e abeja e proceso ta tuma lugar paden di e abeja, y el ta deposita e miel den celnan di e cas. E abeja tin dos stoma: un pa transporta e nectar, y e otro pa funcionnan normal. Ora bastante cel ta yen den e graat, e abejanan ta sella nan cu un was y ta laga e miel hecha. Cu esaki trabao di e abeja den produccion a caba, y nan ta entrega e resto di trabao na Sr. Vieira.

El ta coi e graatnan seyá, corta e capa di was cu un cuchiw special, y cerr'le den un centrifuge. E draaimiento ta brota e miel afor y asina e por worde embotellá. E no tin mester di mas purificacion promer cu e por worde comí.

Cuanto vez pa anja esaki ta sucede? Cuanto miel ta bini for di e casnan?

Na Aruba Sr. Vieira ta haya tres of cuatro cosecha pa anja si awa yobe hopi. Y den un bon anja un cas ta entrega te 25 galon di miel. E trabao pa trafica cu e cahanan grandi ta bira mas duro ora nan ta yen di miel: un galon di miel ta pisa entre 12 y 14 liber.

### Picamento

E promer pregunta tocante abeja ta: kiko ta di e picamento? Un autoridad ta bisa, "abeja ta e mas placentero, mas sociable, mas genial y cu mas mehor temperamento... ora nan ta worde comprendi." Pero tene cuidao cu nan despues di un yobida of banda di anochi ariba dianan fresco, specialmente si bo ta bai banda di nan cas. Sr. Vieira mes a worde picá innumeroso vez, particularmente na un ocasion cu 20 cas a cai hunto. Pa awor ya e picamentonan no ta hacie'le nada mas y ni hincha e ta hincha.

Picamento di abeja por ta fatal pa humano of pa animal. Sr. Vieira a yega di mira burico y baca worde picá te ora nan a muri, y ta tuma solamente algun minut. Pero abeja, mescos cu hende, tin nan bon dia y nan mal dia. Asina Sr. Vieira ta bisa.

Den cada cas tin tres sorto di abeja: e reina, e unico di su sorto. Anto tin e trahadornan, cu ta colecta

(Continua na pagina 8)

NOT FAR from a customer's plate, jars of honey are packed away for sale. Mr. Vieira, shown here, seeks to interest school children in the production of honey and its food values.

NO LEUW for di tayo di un cliente, hotternan di miel ta worde paketa pa hende. Sr. Vieira, munstrá aki, ta husca di interesá muchanan di school den produccion di miel y su valornan nutritivo.

filled, and at right he watches the activity in a brood chamber. All that is visible of the combs is the top edges. vacion den un kamher di broei. Tur loke hende por mira di e graatnan ta e cantonan ariha.

HE HAS no more enthusiastic booster for his product than his 3 1/2-year-old daughter Norma, who would rather have a honey or peanut butter-mixed-with-honey sandwich than any others.

EL NO tin un propogandista mas grandi pa su producto cu su yin Norma di 3-1/2 anja, cu ta prefera un sandwich di miel of di miel bruha cu pinda mulá mas hopi cu tur cos.

he bees from a comb preparatory to capping. Before he is holding a small comb just being taken from el coge'le. Den e retrato mei-mei e tin un was y banda drechi e ta waak e mo-

# Everybody Loves A Circus

Yes, not only does everybody love a circus such as the Circus Brasil, which played Aruba, and whose activities are shown here—everybody has always loved a circus.

Dating from Roman times, two or three centuries before Christ, the circuses had attracted countless numbers of people to witness such events as chariot races, and fighting with wild animals. Today's circus as entertainment bears little resemblance to Caesar's circus. Animal acts, clowns, acrobats, displays of oddities, refreshments, and a constant high level of excitement mark the circus of today.

The names most often thought of

in connection with a circus are Barnum and Bailey, and the Ringling Brothers. Beginning in 1882, the seven Ringlings developed their organization until it was equal in size and popularity to any in the world. But P. T. Barnum, the world-renowned museum operator, combined with James A. Bailey in 1870 to put together a show that really set the pace style for all circuses since. Bailey, the gifted showman, introduced the third ring, and various other innovations, and toured Europe at the head of the largest circus ever put together. The Ringling Brothers bought Barnum & Bailey's in 1907 after Bailey's death.

and in 1919 brought both shows together under the name it now holds.

## The Circus Train

In the days before soaring costs made it financially impossible to continue, the circus train was the most wonderful thing in the world to millions of people. With its long line of red and yellow cars, its early morning arrival and setting up, the sun, the dust, the noise, the sad-faced clowns, the glamorous bon-tamers, elephants trumpeting in the sun, wide-eyed children carrying swaths of pink cotton candy, with all these sounds and sights, the circus stayed in a person's mind long after he left childhood behind. No one who

ever sat in the bleachers, craning his neck upward to see the bold trapeze artists could ever forget their calm bravery and assurance. No one can ever forget the circus.

The Circus de Brasil stopped in Aruba during the course of a long Caribbean tour, and set up its tents in the old RCA football field. Aruba's folks had the show with them for nearly a month, ample time to watch the antics of a trained chimp, a dancing bear, elephants, trainers, and a new twist in circuses, a chorus line.

The troupe arrived here by plane from Jamaica, and left by the same means for its next date in Curacao.

NOT MANY circuses can boast such a leggy display.  
NO HOPI circo por duna un presentacion manera esaki.

GOING ON throughout the show were breathtaking acts like these: a trained bear, above, and balancing cyclists, below.

DURANTE benter e actonan tabalin numeronan manera e siguiente: un beer entrená, arriba, y cyclistanan balanzá, abao.

AS LUMBERING and bulky as the elephant is, (right) he is capable of considerable grace if properly trained.

TAN PISA y granñi manera e olifante ta, (drecht) e por lin hopi libereza y balanza si e worde bon entrená.

## Tur Hende ta Gusta Un Circo

Si, no solamente tur hende ta gusta circo -- tal como Circo Brazil cu a hunga na Aruba, y cual su actividadnan ta munstrá aki -- pero semper hende a yega di gusta circo.

For di tempo di Romanonan, dos of tres siglo promer cu Cristo, circunan tabata atrae innumeroso hende pa mira e eventonan manera puestamento di carioca, y bringamento cu animalnan feroso. E circo di awendia como medio di recreacion tin poco apariencia na e circo di Caesar. Actonan di bestia, payaso, acrobaat, munstramento di cosnan stranjo, refresco y cantidad di excitacion ta e parti mayor di circunan di awendia.

E nombenan cu ta pasa den hende su cabez mas frecuente en conexion cu un circo ta Barnum & Bailey, y Ringling Brothers. Cuminzando na 1882, e siete Ringlings a desaroja nan organizacion te cu e tabata igual den tamanjo y popularidad na cualkier den mundo. Pero P. T. Barnum, e operador di museo di fama mundial a combina cu James A. Bailey na 1870 pa pone hunto un show cu berdaderamente a establece estilo pa tur circo desde e tempo. Bailey, e remarkable artista, a introduci di tres ring, y varios otro novedad, y a viaja den Europa na cabez di e circo di mas grandi cu a yega di organiza Ringling Brothers a compra Barnum & Bailey's na 1907 despues di morto di Bailey, y na 1919 a combina tur dos bao di e nomber cu e tin awor.

Den e temponan promer cu gasto-

nan halto a haci nan financieramente imposible pa continua, e "circus train" tabata e cos di mas maravilloso den mundo pa hopi hende. Cu su fila largo di waggonan geel y corrá, su yegada tempran, solo, stof, lawaai, e payasonan cu cara triste, e gracioso mansadornan di leon, olifantenan gritando den solo, muchanan wowo grandi cu pida cos dushi grandi na man den tur e boroto, e circo tabata keda den pensamiento di un hende hopi tempo despues cu el bira hende grandi. Ningun hende cu a yega di sinta ey den cu nek birá pa laria pa mira e artistanan actua halto arba e trapezio por lubida nan valentia. Ningun hende por lubida e circo.

Circo Brasil a pasa Aruba durante curso di un jira extensivo den Caribe, y a pone su tentnan ariba terreno di futbol bieuw di RCA. Hendenan di Aruba por a mira e spectaculo un luna largo, hopi tempo pa mira un macaco sinjá, un beer bailarina, olifante, entrenador, y e artistanan.

E trupa a yega aki cu aeroplano for di Jamaica, y a regresa pa e mes medio pa su proximo sitio na Curacao.

PA GRACIOSIDAD no tin nada pa iguala macaco. Podiser esun mas inteligente di familia di macaco, e chimpanzee por bira un criatura desarojá, manera esun munstrá aki.

UNBELIEVABLE BALANCE is the trademark of the skilled acrobat, whose only support is a thin, swaying wire.

BALANCE INCREIBLE la e marca di e acrobaat entrená; su unico aguante ta un pida wire delegá cu no ta para keto.

FOR COMIC relief there is nothing to match the monkey family. Perhaps the most intelligent of all the simians, the chimp can develop into a rather talented creature, like the one shown here.

# Creditable Ideas Affected CYI Committee Makes Changes in Plan Rules

Changes which provide a broader base for awards and which allow faster processing of suggestions have been made in the Coin Your Ideas plan. The changes are effective June 1.

Two items were deleted from the list of non-credible ideas and two were added. The results make it possible for the CYI committee to make final rulings on non-credible ideas.

Item "F" in the old list of non-credible ideas was one of the two deleted. This pertained to requests for installation or alteration of lights, walkways, platforms and signs. The committee's experience in the past indicates that many suggestions formerly screened out under this item were subsequently un-screened and processed as credible ideas.

The item covering ideas which were regarded as part of the suggestor's routine assignment has also been deleted. The committee felt that this item dealt more with eligibility for award rather than with credible ideas, and that its deletion assures an investigation of each credible idea submitted, regardless of the suggestor's job duty.

Added to the non-credible list were items covering fields over which the company does not exercise full authority. This includes the function and operation of employee representative groups, and ideas not pertaining to company operations.

The basic philosophy and administration of the plan remain unchanged. The aim of the changes is to speed up processing of ideas and at the same time continue to give each credible idea a thorough review and appraisal.

## Ward Recovering From Illness

Good news of an annuitant in England came to the Esso News recently. Writing for her husband, Mrs. William Ward mentions that he is improving after an illness of two months.

Mr. Ward, a former Marine Department employee, now lives at 89, Portelet Road, Stoneycroft, Liverpool 13, England.

## Booklets Returned Through Mail

A number of the new Aruba booklets mailed to Lago employees have been returned to the Esso News Office. Some had incorrect addresses, some had moved. Listed at right are those whose copies were not delivered. They may pick up their booklets by coming in person to the Esso News Office, Training Division Building, during office hours.

Telephoned requests cannot be accepted.

## Boekinan Debolbe Door di Post

Un cantidad di e boekinan nobo over di Aruba cual a worde gepost pa tur empleadonan di Lago a worde debolbe na Esso News Office. Poco tabatin adres incorrecto, poco a muda. Lista ta esnan kien nan copianan no por a worde entrega. Nan por pasa personalmente na oficina di Esso News, Training Division Building, durante ora di trabao pa busca nan hoeki.

Pedidas pa telephone no por worde acepta.

## Lugar Obtenible Den Seminar

Ainda tin lugar pa e dos curso-nan den Human Relations cual ta cuminsa Juli 8 y 9, asina e Seminar Committee a anuncia.

Formularionan di aplicacion por worde obteni na Training Division Office, EQ-3, y e fecha final pa entrega e formularionan yená ta Juni 15.

Profesor Robert Blake di Universidad di Texas lo conduci e curso.

## Professionalnan Di Tennis ta Bin Duna Demonstracion

Rosewall, Kramer, Segura, Pails... e nombernan grandi aki den tennis lo hunga un wega di demonstracion na Lago Sport Park Juni 12.

No tin ningun titulo grandi di tennis na mundo cu a lo menos un vez no a worde conquistá door di e gran estrellanan aki. Awor hunto den un jira profesional bao di direccion di e hungador-promotor Jack Kramer, nan ta hungando pa e fanaticonan di tennis den America del Norte y Sur.

Com nan lo forma paar pa e wega na Aruba no ta conoci ainda, pero probablemente lo tin dos wega enkel y un dobel.

Pa fin di anja pasá Rosewall tabata conta como e mehor amateur hungador di tennis den mundo, mehor ainda cu Lew Hoad, kende el a derota pa e titulo enkel di Estados Unidos. El tin e mihor backhand desde Budge, y den wega di Davis Cup na Australia, el a gana seis di e ocho weganan enkel. Den e promer torneo profesional el a bati Trabert y Gonzales den enkel y a forma paar cu Hartwig pa gana e corona doble den e mes evento.

Kramer, varios anja tras di su cumbre, ainda por worde contá como sobresaliente ariba su bon dianan y como e mehor hungador di mundo. Te 1947, tempo cu el a bira profesional, el a gana un serie largo di campeonato, incluyendo e titulo doble di Estados Unidos pa homber tres vez, enkel pa homber dos vez, Wimhledon enkel y dobel; el a hunga ariba tres equipo di Estados Unidos pa Davis Cup. El a cuminsa e jira di profesional na 1947, y den e anjanan siguiente constantemente tabata bati Riggs, Gonzales, Segura y Sedgman. Awor el ta concentra ariba promocion, pero ainda ta hunga de vez en cuando.

Segura, e Ecuadoriano chikito, tin un tenida di dos man ariba su racket cu ta permitie'le manda algun salvo pisá ariba su oponente. El no a desarroya completo te tempo cu el a bira profesional na 1947, maske el a gana U. S. Intercollegiate Championship tres anja consecutivo. Den un torneo profesional grandi na Australia el a derota Hartwig, Gonzales y Sedgman den weganan sucesivo.

Dinny Pails ta un hungador entre hungador. Un coach astutuo y estudiante di e wega, el a traha como coach-advisor cu equiponan Italiano, Aleman y Belgica pa Davis Cup. El a gana of casi gana tur e titulonnan grandi, incluyendo e campeonato enkel pa Australia den un di e batayanan mas duro di tennis. Den su unico jira profesional na Estados Unidos el a bati Segura.

Sientanan pa e weganan local costa Fls. 5 y Fls. 2.

MAKING ITS debut at Gate 9 is a sparkling new safety scoreboard. Safety Inspector Fran Wernet makes it official by running up the green and white flag representing the company's last award of honor. NA PORTA 9 un borchi di seguridad nobo-nobo a worde instalá. Inspector di seguridad Fran Wernet ta bacie'le oficial door di hiza e banderanan representando e ultimo premio di bonor di compania.

## Aruba Camera Club Schedules Photo Contest

Photography enthusiasts in the Antilles, who are members of a recognized camera club, have been invited to participate in a photography contest sponsored by the Aruba Camera Club.

Entries should be submitted to the club, in care of J. van Eijk, 79 L. G. Smith Boulevard, Oranjestad, by June 20 in order to be eligible. The entries will be on display in the Trocadero starting June 29.

Three categories are available for entrants: black and white pictures for beginners, black and white for advanced amateurs, and color slides. Contestants should submit three pictures in whichever category they choose.

Beginners may have their pictures processed by professionals, but advanced amateurs must process their own. Pictures not eligible to be entered are those which have been awarded prizes in other contests (except club contests).

The black and white photographs should be at least 8 x 10 inches, and preferably 11 x 14, mounted on light colored pasteboard. Recommended dimensions of mounted pictures is 16 x 20 inches. Subjects are open. Subjects of slides can also be the

photographer's choice, and all should be 24 x 36 mm in size.

In submitting entries, contestants must also submit in a sealed envelope his full name, address and the pseudonym he is using for the exhibit.

On the outside of the envelope should be written his pseudonym and the category he is entering. Each picture entered should also carry his pseudonym and be numbered (1, 2, 3).

A silver plaque for first prize, a bronze plaque for second prize and three merit awards will be awarded in each category.

## Faunce ta Retirá Den Mechanical

S. G. Faunce, un empleado di Lago desde 1934, a laga Aruba Mei 31 cu vacacion precidiendo su pension cu ta cuminsa Augustus 1.

El a cuminsa su carera cu compania na Februari 1934 como tradesman den Machinist Craft, y a worde promoví pa subforeman na November 1936. El a bira assistant general foreman na October, 1941, tambe den Machinist y zone foreman na Januari 1951.

AN IMPROMPTU company news conference was held May 17, the night the referendum ended. Here B. Teagle, public relations manager, left, gives the voting results to A. Cloo of Voz di Aruba (right) and D. Wolff, with pad, of Arubaanse Courant.

UN CONFERENCIA impromptu di prensa a worde tení Mei 17 e anochi cu e referendum a caha. Aki B. Teagle, gerente di relaciones publica, robez, ta duna e resultadonan di votamento na A. Cloo di Voz di Aruba (banda drechi) y D. Wolff, cu papel den man, di Arubaanse Courant.

FOR THREE days last month, representatives of 10 oil companies, all affiliates of Standard Oil Co. (N. J.), met at Lago to discuss manufacturing problems. Geographically the companies ranged from Canada's Imperial Oil, Ltd., to Argentina's Sociedad Anonima Petrolera Argentina.

TRES DIA luna pasá, representantenan di 10 compania di azeta, tur afiliadonan di Standard Oil Co. (N.J.) a encontra na Lago pa discuti problemanan di fabricacion. Geograficamente e companianan tabata varia di Imperial Oil, Ltd. di Canada pa Sociedad Anonima Petrolera di Argentina.

## World's Best Tennis Coming Here

Jack Kramer

Dinny Pails

Ken Rosewall

Pancho Segura

## Stars To Play at Sport Park

Rosewall, Kramer, Segura, Pails...these great names in tennis will play an exhibition in Lago Sport Park June 12.

There isn't a major tennis title in the world that hasn't been won at least once by these great stars. Now banded together in a professional tour under the leadership of are playing before tennis fans in the United States and South America.

Pairings for the Aruba matches are not yet known, but there will be two singles matches and one doubles.

Ken Rosewall, by the end of last year, was ranked as the best amateur tennis player in the world, better even than Lew Hoad, whom he beat for the U. S. singles title. He has the best backhand since Don Budge, and in Davis Cup play for Australia, won six out of eight singles matches. In the first pro tournament he beat Tony Trabert and Pancho Gonzales in singles, and teamed up with Rex Hartwig to win the doubles crown in the same event.

Kramer, years past his prime, can still be ranked on his best days as the world's best player. Up to 1947, when he turned professional he had won a dozen championships, including U. S. men's doubles three times, men's singles twice, Wimbledon singles and doubles. He played on three U. S. Davis Cup teams. He started the professional tour in 1947, and in the next few years steadily whipped Bobby Riggs, Gonzales, Pancho Segura and Frank Sedgman. He now concentrates on promotion, but still plays on occasion.

Segura, the minute Ecuadorian, brings to the court a two-handed grip on his racket that permits him to unload some devastating shots on his opponent. He has more than a freakish grip to recommend him, however. He didn't fully develop until he turned pro in 1947, even though he had won the U. S. intercollegiate championship three years in a row. In a big professional tournament in Australia he beat Hartwig, Gonzales and Sedgman in successive matches.

Dinny Pails is the player's player. An astute coach and student of the game, he has worked with Italian, German and Belgian Dav's Cup teams as advisor-coach. He has won or almost won nearly all of the major titles, including the Australian singles championship from one of the toughest fields ever assembled. In his one U. S. pro tour he beat Segura.

Seats for the local matches are priced at Fls. 5 and Fls. 2 and can be bought from Eddie Croes, Ron Smith, A. J. M. Smits, or at Ezzo Club Bookstore, De Wit Bookstore, or from Lago Sport Park Board members.

## Abeja

(Continued from page 5)

e nectar, stuifmeel y was for di e floran, duna e chikitonan di come, protega e cas y traha e graatnan. Tambe nan ta hunga un parti importante den traslado di e stuifmeel di un mata pa otro, asina produciendo mas fruta. Esakinan ta traha asina duro cu nan no ta biba mas cu seis luna, of menos ainda den un periodo di bondanza. Por ultimo tin e machonan. Nan tin un funcion sol, y solamente uno ta hacie'le, y esey ta broeimento cu e reina. E otronan, pa resto di nan bida, no ta haci nada otro sino come miel. Pero ora un influjo di miel pasa e trahadornan ta corre nan for di den cas pa bai muri leuw. Casi ningun macho ta muri un morto natural. E unico distincion di nan ta e wowo cu ta bira tur rond. Nan no tin ni poei.

## Reina ta Manda

Bida den e cas ta centraliza rond di e reina, kende ta mama y reina. E reina ta paar un vez sol y esaki ta permitie'le pone webo pa resto di su bida. Tin vez te 1800 pa dia; semper e ta pone webo dependiendo di necesidad di e colonia y abilidad di e trahadornan pa cria e chikitonan. E reina por biba te 10 anja. Esaki ta su periodo di bida, pero nunca e tenedor ta lage'le biba asina hopi pasobra su ponemento di webo ta atraza, cual ta importante pa tene e cas ariba su propio forza. Su bida largo ta bini pa motibo cu e no tin hopi di haci, excepto pone webo, y pa motibo di su cuminda. Durante su bida e ta worde duná un secrecion cu yama elixir door di su atendienan. E elixir aki cu ta dun'e vigor y vitalidad a worde usá cu resultadonan maravilloso ariba huranonan. E ta rejuvena, duna energia y forza y salud, y e ta un di e remedenan cu a reestablece salud di Papa Pio XII na 1954.

Ora un cas bira yen di mas y e inhabitanten decidi di move, ante ta tuma lugar e "zwerimento." Nan ta sali na gran cantidad y para na waya, mata of cualkier camina. Tenedornan por cuokier nan facilmente na e momento aki, pasobra nan ta cargá cu miel y pisá pa bula.

E producto principal di un cas ta miel, cual no solamente ta un smaak bon, pero ta un alimento masha saludable. Atletanan ta tume'le pa

## Clark lo Cabezá Prome Seminar Di Human Relations

E homber cu un vez a bisa 200 admirante y general Americano pa "pensa of cerra boca," Charles H. Clark, ta habri e cursonan ofreci door di Seminar Committee e verano aki.

E cursonan cu el lo guia ta un seminar di cuatro grupo cu ta topa dos vez pa siman, tratando ariba "Creative Thinking," basá ariba su desarojo y e afamado metodo di "brainstorming."

E metodo aki, originá door di Alex Osborn, un di e figuranan prominente di advertencia, ta consisti di gruponan chikito papiando informalmente ariba problemanan specifico y contribuyendo ideanan pa su solucion. Tur ideanan, maske com ridiculo ta worde acceptá, siendo e teoria cu un idea ta saca un otro, y e solucion ta worde obteni asina door di e grupo.

Sr. Clark, un empleado di Ethyl Corporation, a yega di traha cu algun otro compania di azeta demonstrando su program. Su curriculum ta inclui Ezzo Standard Oil, Standard Oil of Indiana, Shell, Humble, Tidewater y Socony Mobil, y tambe Edercito y Marina di Estados Unidos.

Su klasnan na Lago, di cual tur ta yen, ta cuminsa Juni 11 y lo termina Juli 5.

energia; hendenan na diete ta come'le pasobra e ta nutritivo y ta yena liher mientras e no ta engorda mucho. E no tin mester di digestion pero ta drenta inmediatamente den e corida di sanger. Un otro producto ta was, cual e abeja ta trece for di e floran na mes momento cu e trece e miel. Den su macutonan di pia e ta trece stuifmeel pa e chikitonan. E trahadornan ta converti e was aki den graat, e celnan di cual ta yená cu honing. (Despues cu e tenedor saca e honing, e ta mande'le pa un lugar special cu ta traha fundeshi pe. Fundeshi ta principio di un graat ariba cual un abeja ta traha.)

Por di honing ta bini tambe "agua-miel," cual algun historiador ta considera e bebida alcoholico mas bieju cu hende conoce, cu ta mencioná den literatura di practicamente tur idioma, cu ta adorá door di Scandinavianonan, y nunca lubidá door di esnan cu a yega di purbe'le.

Tenedornan di abeja por ultimo ta consequi un multitud di satisfaccion y hopi picá. Puntra Sr. Vieira; el sabi

## April CYI Awards Push Year's Total to Fls. 10,000

Cash awards under the Coin Your Ideas plan in April have pushed 1957's total disbursements for employee suggestions up to Fls. 10,055. Last month 58 awards were made, which amounted to Fls. 1,665. C. H. Walter, of the Storehouse, and A. Binetti, Mechanical-Yard, had Fls. 100 awards, and L. Tromp of Cracking had one for Fls. 75.

Here is the complete list of April winners.

Accounting		L. E. Archibald	Fls. 25
R. H. Chin-A-Loi	Fls. 20	E. Trimon	Fls. 25
Colony Service		L. Sawney	Fls. 20
F. Shortt	Fls. 20	LOF	
Executive		J. Erasmus	Fls. 25
F. L. Hodge	Fls. 40	P. I. Bennett	Fls. 25
Alexander Hoo	Fls. 30	C. F. Mapp	2 @ Fls. 20
Ind. Rel.		F. S. Kelly	Fls. 20
A. Hassell	Fls. 25	Rec. & Ship.	
Marine		C. W. Gumbs	Fls. 25
R. C. Oduber	Fls. 40	Utilities	
E. Wijdh	Fls. 20	J. Gario	Fls. 30
Mechanical Admin.		Tech. Serv. Dept. EIG	
J. Kelly	Fls. 30	O. J. Mauricio	Fls. 30
J. H. E. Baiz	Fls. 30	A. Tromp	Fls. 25
T. P. Viapree	Fls. 20	W. L. Myers	Fls. 20
B. Werleman	Fls. 20	Eng.	
E. V. Connor	Fls. 20	L. M. Jessup	Fls. 25
L. C. Edgar	Fls. 20	Proc. Eng.	
Storehouse		W. Geerman	Fls. 25
C. H. Walter	Fls. 100	Lab.	
Mech.-C&Z. Use of Aerokroil in Mechanical Department.		G. Rougier	Fls. 20
J. Dania	Fls. 25		
Machinist			
W. Arrindell	Fls. 35		
J. de Cuba	Fls. 35		
F. P. Croes	Fls. 30		
G. Croes	Fls. 30		
R. Lo A Njoe	Fls. 25		
E. Carrilho	Fls. 25		
R. Colina	Fls. 20		
I. D. Schotborg	Fls. 20		
Electrical			
A. Rojer	Fls. 35		
P. A. Lewis	Fls. 30		
A. M. Abends	2 @ Fls. 20		
S. E. Reed	Fls. 20		
Gar & Transp.			
J. F. L. Artsen	Fls. 30		
C. Gumbs	Fls. 25		
Yard			
A. Binetti	Fls. 100		
Mech.-C&Z. Run the 1 1/2" acid line in the abandoned 4" line west of the lead bonding building.			
Carp. & Paint			
C. Romney	Fls. 20		
Instrument			
F. H. Vingal	Fls. 25		
Process Acid & Edal.			
E. Wester	Fls. 35		
C&LE			
E. Erasmus	Fls. 25		
A. C. Cooks	Fls. 20		
T. Kelly	Fls. 20		
Cracking			
L. Tromp	Fls. 75		
N. M. Werleman	Fls. 30		
J. B. Tromp	Fls. 30		
S. B. Francis	Fls. 25		

## Miss Bee

(Continued from page 4)

with honey, and are in a lazy, quiet state.

The biggest product of a hive is honey, which not only tastes good, but ranks as one of the healthiest foods around. Athletes swallow it for quick energy; dieters use it because it is nourishing and filling without being too fattening. It requires no digestion, but goes directly into the blood stream. A second product is wax, which the bee brings back from the flowers the same time she brings the honey. She also brings in her leg baskets pollen for the young. The workers convert this wax into combs, the cells of which are filled with honey. (After the beekeeper removes the honey, he sends this wax off to a specialty house which manufactures foundations for him. Foundations are the start of a comb on which the bees build.)

From honey too, comes mead, regarded by some historians as the oldest alcoholic beverage known to man, mentioned in the literature of practically every language, and never forgotten by those whose tongues have been caressed by its velvety strength.

From beekeeping as well comes a great deal of enjoyment and satisfaction and some stings. Ask Alfred Vieira; he's had them all.

HECTOR CONSTANCE (right) flips out a jab in the general direction of Gerald Gray of Jamaica in the course of their ten-rounder recently. Gray kept his two year winning streak alive by decisioning the veteran from Trinidad.

HECTOR CONSTANCE (bando drechi) ta manda un jab den direccion general di Gerald Gray di Jamaica den curso di nan encuentro di 10 rond aki. Gray a manlene su racha di victoria door di gana un decision ariba e veterano di Trinidad.
